Farm for the Future

 AGRONOMIC FOR
COMMUNITY EMPOWERMENT

Weekly News 13/2024.

March. 25th 2024.

Potato Harvesting to start coming weeks

As we prepare ourselves for potato harvesting coming next week. We now have the potato specialist from our partners on the field to train our team in harvesting and grading.

Farmers for the Future Program to take a new path to the future.

Exciting news! The journey towards lifting 2000 smallholder farmers out of poverty by 2030 has officially commenced. We recently held a productive meeting with Village heads, Ward Executive Officers, and Agriculture extension officers from 16 villages to discuss the challenges currently faced by our dedicated small-holder farmers. During the meeting, we delved into the various obstacles hindering the progress and prosperity of small holder farmers. From limited access to resources and technology to unpredictable rain and market conditions.

The attendees wholeheartedly embraced and endorsed FFF's ambitious program aimed at transforming the lives of smallholder farmers. Their unwavering support and commitment have reinforced our belief in the positive impact this initiative can have on rural communities.

Moving forward, we are dedicated to work together with the government of Tanzania, International and National development organizations, our partners Yara, and Seed Co, small holder farmers and other agriculture stakeholders in cultivating a sustainable future for small holder farmers.

Stay tuned for updates on our progress as we work towards creating a brighter tomorrow for smallholder farmers across our region.

Farm For the Future & Agronomic for Community Empowerment

“A unique model to end poverty with Commercial farming and Community Empowerment on the same arena”
